PCIM Ref: no.: N287-18531

Dear Sir/Madam,

With reference to Pre Inspection Meeting hold dated October 20, 2021 we would like to send our best possible workable ITP as attached for your kind attention.

This is prepared despite the fact that during the meeting we have tried to specify that we are using world leading ISO Certified Companies with the highest grade qualification control for process and material. However, we had faced many requirements which are not common for these very small size Compressors. This is worthy to mention that in compressor has no welding and NDT is not applicable.

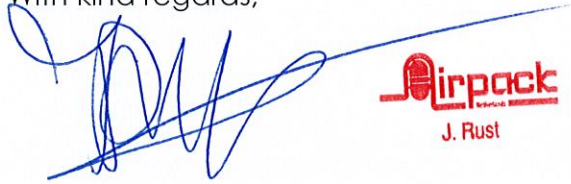

As of Now, we have been forced to put compressor manufacturing on HOLD as well as Procurement of main materials such as Motors is on HOLD as well, and we need to proceed with much faster speed.

We would like to request esteemed client to let us have approved ITP which is prepared with our outmost efforts for compliance with your requirements within 2 Working days enabling us to purchase other main items/ remove hold from compressor manufacturing early next week and avoid further delays in the project execution. As you for sure now, right now material supply delivery time has been increased drastically in Europe, and accordingly esteemed client hand in hand support is highly needed and appreciated.

A red circular stamp with the initials 'J.R.' inside, located in the bottom right corner of the page.

Trust to have informed you sufficiently and looking forward hearing soon from you.

With kind regards,

A handwritten signature in blue ink, appearing to be 'J. Rust', written over a red Airpack logo. The signature is stylized and somewhat illegible.A red Airpack logo with the name 'J. Rust' printed below it.
